

# Product Range RivePipe

Extractable, removable and reusable formwork tube or sleeve, used a spacer for concrete structures

## RIVEPIPE 27 MALE

Article Code	Description (L)	Diameter A (mm)	Diameter B (mm)	Diameter - C For a max. tie bar diameter of (mm)
RPM27100	100 mm	29	48	19
RPM27200	200 mm	29	48	19

## RIVEPIPE 27 FEMALE

Article Code	Description (L)	Diameter A (mm)	Diameter B (mm)	Diameter - C For a max. tie bar diameter of (mm)
RPF27100	100 mm	29	48	19
RPF27120	120 mm	29	48	19
RPF27140	140 mm	29	48	19
RPF27150	150 mm	29	48	19
RPF27200	200 mm	29	48	19

\*Availability in other sizes on request

## RIVEPIPE 21

Total L	[mm]	100	120	150	180	200	240	250	300
L <sup>+</sup>	[mm]	95	115	145	175	195	65	75	125
L <sup>-</sup>	[mm]	5	5	5	5	5	175	175	175
Weight	[g]	23	28	35	42	46	55	58	70
Article number		RP21W100E	RP21W120E	RP21W150E	RP21W180E	RP21W200E	RP21W240E	RP21W250E	RP21W300E

## EXTENDERS RIVEPIPE 27 – GRAY PLASTIC

Article Code	Description (L)
RPEXT27250	250 mm
RPEXT27300	300 mm
RPEXT27400	400 mm
RPEXT271000	1000 mm

\*Availability in other sizes on request

### 1. EXTRACTING TOOL

Article Code	Description
ROUT001	RIVEOUT - EXTRACTING TOOL FOR RIVEPIPE

### INSTALLATION AND APPLICATION

**1**  
Pre-assemble the male and female parts of RivePipe during the installation of the formwork system for concrete walls<sup>1</sup>

**2**  
Place the RivePipe between the formwork panels to protect the tie rods

**3**  
RivePipe is selected and placed according to the desired wall's thickness.

**4**  
Once the wall has been formed, and the panels have been released from their framing, insert the RiveOut extraction tool's tip into the RivePipe. Screw the RiveOut head clockwise into the Rivepipe.

**5**  
Remove the RivePipe with the help of the RiveOut by performing a counterweight action, with a linear displacement, in the direction from the wall towards the operator. This action must be done on both sides of the wall, in order to extract the two parts: female and male.

**6**  
Expel the RivePipe from the RiveOut performing the counterweight action again, but now, in the opposite direction to the extraction. Keep the Rivepipe for your next reuse. The formwork tie hole remains now clean and homogeneous, and prepared to be sealed with RiveStop
